Coordinator and Revit MEP/BIM Modeler

PROFILE

I am a passionate professional in MEP/BIM coordination and modelling with solid experience in the field. I am motivated to join your company to bring my advanced technical skills and my ability to effectively manage complex projects. My in-depth knowledge of standards and regulations, along with my proficiency in CAD and BIM software, make me a valuable asset to your team.

PROFESSIONAL SKILLS

- In-depth knowledge of standards and regulations related to fluid installations.
- Ability to plan and coordinate activities of various stakeholders on the construction site.
- Project management skills to plan tasks, allocate resources effectively, track deadlines, and stay within budget.
- Cost management expertise for HVAC and fluid work, including cost estimation, expense tracking, and managing variations.
- Monitoring project progress and implementing necessary corrective actions.
- Experience with studies in air conditioning, ventilation, and smoke extraction.
- Proficiency in CAD software such as AutoCAD 2D/3D / Auto Fluid.
- Ability to create and modify Revit families specific to MEP disciplines.
- Extensive knowledge of Revit MEP including 3D modeling, creating custom families, managing views and sheets, and collaborating with other disciplines. Familiarity with other BIM software like Navisworks for clash detection and coordination.
- Proficiency in fabrication software such as CADmep, ESTmep, and CAMduct.
- Experience with project management tools like Autodesk BIM 360 or other collaborative platforms.
- Preparing attachment plans and project metrics.
- Proficient in Adobe Photoshop, Illustrator, After Effects, and Element 3D v2 (plugin for After Effects).
